PROFESSIONAL SUMMARY

MCA graduate, looking to start my career as a Full-Stack Developer with hands-on experience on building production-grade MERN applications. Designed and developed an e-commerce platform, an academic management system serving three distinct user roles. Comfortable across the entire development cycle from schema design and backend logic to React UI and model integration motivated by clean architecture, measurable performance, and shipping things that work.

EDUCATION

Master of Computer Applications (MCA) *June 2024 – June 2026*
Vellore Institute of Technology (VIT), Vellore
